LYNX CUTS FEEDER ROUTE TO POINCIANA SUN RAIL STATION

Libertarians stand against failed promises by county

Osceola, FL, April 3, 2018– At last night's meeting the residents of Osceola County were informed that the Lynx would not be providing the feeder route promised to the residents of Poinciana. This route would connect Poinciana to the ironically called "Poinciana" Sun Rail station located 10 miles north of Poinciana.

How sad will it be that basically, we are relegating people to their cars to drive to the station when our goal is to try and get a lot of these cars off the road. (Commissioner Janer)

Poinciana has been continuously neglected when it comes to public transit. The Libertarian Party believes that if the Lynx is unable to fulfill the needs of the residents of Osceola County, the BOCC should consider eliminating all contracts and payments as well as all taxes and fees associated with Lynx service. This will then free up the BOCC to allow a sealed bid for a private contracting entity to fill the need. This solution does not only allow for improved services but a far more efficient and less costly service as well.

Libertarian Party, For a Better Osceola
